

### **Environmental Engineer/Scientist**

Polestar Technologies is looking for a qualified *Environmental Engineer or Scientist* to support our operations in Needham, Massachusetts or Edgewood, Maryland. This position will support our commercial and government client engineering and technology development programs in the areas of environmental assessment, planning, review, and permitting. The ideal candidate will possess at least 10 years experience in environmental regulatory analysis, interpretation and compliance, and the review, preparation, filing, and updating of a wide variety of environmental documentation, including:

- National Environmental Policy Act (NEPA) documentation
- Resource Conservation and Recovery Act (RCRA) Research, Development and Demonstration (RD&D) Permit Applications
- Clean Air Act, Air Permit Applications
- Environmental Impact Statements
- Environmental Assessments
- Hazardous Waste Permits
- Etc.

Experience with successfully ushering large and small-scale government and commercial technology development and evaluation programs through to full-scale implementation is necessary to fulfill this challenging position. Specific experience in energetic manufacturing, biofuels, or chemical/explosive demilitarization industries is a plus.

### **Responsibilities**

- Participation in teams of Scientists, Engineers, and Information Technology staff to conduct aggressively scheduled technology development, evaluation, and implementation programs
- Review of technology and plant design documents for impacts on, and compliance with, environmental documentation
- Preparation of regulatory analysis reports
- Preparation and/or review of environmental documentation associated with government and commercial technology development, evaluation, and implementation programs
- Interacting with regulatory authorities on behalf of client organizations
- Preparation of high quality environmental compliance plans and reports
- Lead or participate in environmental audits and performance assessments

### **Requirements**

- BS/MS Degree in Environmental Engineering, Environmental Science or directly related field
- >10 years experience in environmental permitting and compliance
